

I was going to sell all my gear before I left because I'll be renting for a while, but my work wanted me up here pretty quick so I didn't get a chance to sell everything, so I loaded it up and brought it with me. I'd like to sell the whole lot for \$2k if you or another ham is interested.

Here's a list of the notable stuff:

7month old FTdx-710, not field, comes with spkr, etc, as new in box  
external slim monitor with interface cable  
Astron RS35M PS  
AL811H amp with new Taylor Tubes  
LDG ATPro auto tuner  
chrome Vibroplex paddles  
dual band mobile  
M-70 desk mic as new in box  
D104 mic, and a D104 clone that they got sued for  
large Daiwa 2kW 901 meter  
Anderson power pole strip

There are other things I don't recall off the top of my head, but all the ham gear I have will be included.
